

Thank you for joining

Kentucky's COVID-19 vaccine decisionmakers will share updates and progress regarding distribution of the vaccine to residents of the Commonwealth on this free 1-hour webinar.

The Foundation for a Healthy Kentucky will host Public Health Commissioner Steven J. Stack, MD, MBA, FACEP, and Transportation Cabinet Secretary Jim Gray, who is chairing a new task force on the COVID-19 vaccine distribution.

The Foundation for a Healthy Kentucky launched the Health for a Change series in 2011 as part of an effort to support nonprofit and health leaders across the Commonwealth in their work of improving health in Kentucky.

Vaccine Distribution Update

We've made solid progress, but patience is still key.

482,039

Total Unique Persons Vaccinated in KY

As of February 10th

83%

of first doses received have been administered

As of February 10th

The vaccine supply remains very limited. **Continued patience is key.**

The vaccine distribution strategy includes **both regional, high-capacity sites and local sites** to meet the differing needs of Kentuckians.

We are ramping up our infrastructure so that, as supply increases, we are **ready to get it in arms as quickly as possible.**

**It's all about three words:
supply, supply, supply.**

**Vaccine distribution is a
complex logistical project.**

Vaccine distribution is a complex logistical project.

Today

Vaccine supply remains very limited currently. The week of February 1, Kentucky received approximately **68,000 doses**

If supply levels stay the same....

At current supply levels, if we were to use every dose every week, and each member of the 16 and older population received their two vaccines, it would take, at minimum, **15 months to vaccinate Kentucky.**

Allocating to counties

In February, starting this week, each of Kentucky's **61 local health departments** will receive a vaccine allocation equivalent to **100 doses for every 1% population** in their county(ies)."

Herd Immunity

Experts estimate at least **70% - 80%** of Americans need to get vaccinated to achieve herd immunity.

That adds up to approximately **2-2.4 million Kentuckians.**

We are identifying new local and regional sites week over week.

Week of Feb. 1: first regional site launched.

Existing Sites

New Sites for the Week of February 1st

Disclaimer: The location of each site is an approximation.

Week of Feb. 8: four new regional sites launched.

Existing Sites

New Sites for the Week of February 8th

Disclaimer: The location of each site is an approximation.

Week of Feb. 8: allocations for every health department announced.

-  Existing Sites
-  New Sites for the Week of February 8th
-  Local Health Departments

Disclaimer: The location of each site is an approximation.

Week of Feb. 12: adding federally supplied pharmacy sites.

-  Existing Sites
-  New Sites for the Week of February 8th
-  Local Health Departments
-  Federally Supplied Pharmacy Sites as of February 12th

Disclaimer: The location of each site is an approximation.

We're ramping up for increased supply.

Our distribution plan is strategic, equitable, and is based on CDC guidelines.

Kentucky is distributing the COVID-19 vaccine in **phases** with a focus on reaching the **most vulnerable members of society** as quickly as possible. To reach the most people quickly, Kentucky has instructed all vaccine sites to **administer at least 90% of all vaccines** they receive within seven days of arrival at their facility.

These timelines are dependent upon on vaccine availability and are subject to change.

	Eligible Populations	Estimated Timing
Phase 1a	Long-term care and assisted living facilities, health care personnel	December 2020 – Winter 2021
Phase 1b	70 and older, first responders, K-12 personnel (in-state K-12 only)	January 2021 – Spring 2021
Phase 1c	60 and older, persons with high-risk conditions, essential workers	February 2021 – Summer 2021
Phase 2	40 and older	Late Summer 2021 – Winter 2021
Phase 3	16 and older	Fall 2021 – Winter 2022

Note: Vaccination Phases are updated as of January 27th

We've created several vaccine information resources for Kentuckians.
